- > Points heating commissioning and maintenance becomes very fast, accurate and reliable with the application specific Flexo systems.
  - Flexo points heating moulded blocks, for use with the modern strip type heaters
  - Flexo points heating harnesses, for use with the older style pad and cartridge heaters
- > Waterproof antivibration plug allows the heater element to be connected or isolated in seconds.
- > Designed to reduce installation times to an absolute minimum e.g. the 4-heater system can be commissioned with just 4 minutes being spent between the rails (the block can be wired alongside the track then fed under the rail).
- > Neoprene construction inhibits vibration degradation.
- > A 100% testing regime is rigorously employed. Every moulded block, harness and antivibration plug lead is tested for electrical continuity and voltage withstand. In addition, each moulded block and harness is subjected to a 24hr water immersion test - guaranteeing the waterproof properties.
- > Strip type point heaters:
  - Catered for with the moulded block system
  - 2 way, 4 way and 8 way blocks available
  - Galvanised steel keep plates provide protection from accidental damage or vandalism
  - 4 core 1.5mm<sup>2</sup>, 8 core 1.5mm<sup>2</sup> and 8 core 4mm<sup>2</sup> EPR/PCP cables available
- > Pad and cartridge heaters:
  - Catered for with the harness system
  - 2 core and 8 core harnesses available
- > The Flexo moulded block system is fully type approved to Network Rail RT/E/S/40045 and Network Rail Type Code of Practice RT/E/S/40045.
- > The Flexo harness system is fully approved to Network Rail specification PS99A.
- > With origins stretching back over 100 years, Prysmian has an enviable reputation for product quality and innovation design.
- > Prysmian Components manufactures and supplies to accredited Business Management Systems BS EN 9001 and 14001 and is certified to OHSAS 18001.
